ACADEMIC AND STUDENT AFFAIRS COMMITTEE
NOVEMBER 16, 2010
3:00 P.M.
WELLS FARGO PLACE
30 7TH STREET EAST
SAINT PAUL, MN

Please note: Committee/Board meeting times are tentative. Committee/Board meetings may begin up to 45 minutes earlier than the times listed below if the previous committee meeting concludes its business before the end of its allotted time slot.

(1) Minutes of September 14 2010  (pp. 1-8)
(2) Academic and Student Affairs Update
(3) Mission Reaffirmations:  (pp. 9-23)
   • Bemidji State University
   • Minnesota State University, Mankato
(4) Progress on Committee Goals  (pp. 24-30)
(5) Development of the 2012-2014 System Action Plan  (pp. 31-32)
(6) Follow-up to OLA Evaluation of the System Office  (pp. 33-40)
(7) Recognition of SkillsUSA Award Recipients  (pp. 41-43)

Members
Christine Rice, Chair
Duane Benson, Vice Chair
Christopher Frederick
David Paskach
Tom Renier
Louise Sundin
James Van Houten

Bolded items indicate action required.
The Minnesota State Colleges and Universities Academic and Student Affairs Committee held a meeting on September 14, 2010, at Wells Fargo Place, 4th Floor, Board Room, 30 East 7th Street in St. Paul. Chair Rice called the meeting to order at 1:23 pm.

1. Minutes of July 20, 2010

   The minutes from the July 20, 2010 Academic and Student Affairs Committee meeting were approved as written.

2. Minutes of August 19, 2010

   The minutes from the August 19, 2010 Academic and Student Affairs Committee meeting were approved as written.

3. Academic and Student Affairs Update – Interim Vice Chancellor Olson

   - Interim Vice Chancellor Olson gave an overview of the budget reductions in the Academic and Student Affairs Division. He said cuts were made strategically.

     Four areas in the division are impacted by the reductions, with a total loss of 11 positions. Combined with 11 additional positions cut the past two years, the division will have a 32 percent overall reduction in state-funded positions.

     The Center for Teaching and Learning and the Credentialing unit are being restructured, which will result in a reduction of several personnel. One position is being cut in Research and Planning and the EMS functions of the Fire Center will be transferred to the Finance Division, he said.
Trustee Van Houten asked if the Fire Center Library would be moving to a campus. He said it is an outstanding resource and is one of the few places where safety officials in the Midwest can do research.

Interim Vice Chancellor Olson said there are ongoing conversations about moving the library, as well as some of the Fire Center’s educational functions, to a campus, but no decisions have been made yet.

- A new online service to help veterans and members of the armed forces identify whether their military training can count for college credits in the Minnesota State Colleges and Universities system has recently been launched, Interim Vice Chancellor Olson said. The Veterans Education Transfer System (VETS) is the first of its kind in the nation.

The system was developed with the assistance of the Minnesota National Guard and the Minnesota Department of Veterans Affairs. Funding for developing the transfer system came from a federal grant supported by members of Minnesota’s congressional delegation.

- There is a new Career OneStop website, done in collaboration with the Department of Employment and Economic Development, which helps people match current occupational skills and experiences to new careers and suggests training needed for these career changes. The website is called mySkills myFuture.

- Trustee Benson said the Board of Trustees’ retreat in October will focus on what the Board can do that will have the greatest impact on the students and state in the future, long after current members have left the Board.

4. Mission Approvals:

Board Policy 3.24 requires institutions to have their missions approved by the Board of Trustees at least once every five years.

- **Dakota County Technical College**  
  **Presenter:** Kelly Murtaugh, Vice President of Academic and Student Affairs

  **College vision:** Dakota County Technical College will be recognized as a leader in providing quality technical and general education needed for employment in an ever-changing work environment.

  **Mission statement:** The mission of Dakota County Technical College is to provide collegiate-level education for employment that will empower individuals to enhance their opportunities for career advancement and success in a global economy.
Discussion:
Vice President Murtaugh said the vision, mission and purposes presented reaffirm the institutional mission approved by the Board of Trustees in 1998. The college continues to be committed to technical education excellence and there are no changes in the mission statement, she said.

When asked about enrollment trends at the college, Vice President Murtaugh said enrollment is going upward at a steady rate. It is up 9 percent this year and spring enrollment looks to be as strong as last year’s rate, which was one of the best semesters ever at the college.

The college’s primary service area is the southern metro area, but several unique and innovative programs draw students from throughout the state, as well as the nation, she said. Those programs include railroad conductor, biomedical equipment repair, nanoscience technician and wood finishing technology.

Trustee Benson asked Vice President Murtaugh if it would be helpful if the Board were to clearly specify college readiness expectations for incoming freshmen.

Vice President Murtaugh said defined expectations may be helpful since many students, as well as their parents, have assumptions about programming at an open access technical college. The college and its curriculum have dramatically changed over the past 40 years, she said.

Trustee Van Houten said he remains concerned about the state of technical education in the system. The Board of Trustees recently approved mission changes for two technical colleges, allowing them to become comprehensive colleges. Such changes should be made in a more strategic manner, he said, adding he would like to see this issue receive additional discussion by the Board.

A motion was made by Trustee Benson and seconded by Trustee Renier that the Academic and Student Affairs Committee recommends that the Board of Trustees approve the request by Dakota County Technical College to reaffirm its vision, mission, purposes and array of awards as listed in the executive summary. The motion carried, with one abstention from Trustee Van Houten, who said he would like the issue of technical college mission changes to be discussed again by the Board of Trustees and handled in a more strategic manner.

• Northland Community and Technical College:
  Presenter: President Anne Temte
College vision: Northland Community and Technical College will be widely recognized as a progressive leader in community and technical college education, responsive to the needs of our learners through the use of partnerships, innovation and technology.

College mission: Northland Community and Technical College is dedicated to creating a quality learning environment for all learners through partnerships with students, communities, businesses, and other educational institutions.

Discussion:
President Temte said the college had a very robust strategic planning process in fiscal year 2008-2009 which involved 350 participants. At that time participants determined that they were satisfied with the existing mission and vision statements, which were approved by the Board in 1999.

The northwestern part of the state has not suffered the effects of the recession as severely as other regions have, President Temte said. Companies in their area are still hiring and experiencing growth. Enrollment at the college was up 6 percent last year and enrollment is holding steady so far this year.

Part of the enrollment increases may be linked to strong recruitment efforts, President Temte said. There are ongoing efforts to make connections with students who are in jeopardy of not completing high school. Since many high schools have reduced technical education offerings the past few years, the college has worked to attract students who are more inclined toward vocational education.

There also has been a 12.5 percent increase in students of color at the school, President Temte said.

Trustee Van Houten asked what is meant by the terms “progressive leader” in the vision statement. President Temte said that terminology is meant to indicate a desire to develop and offer cutting-edge programming and services in anticipation of the needs of students and communities.

Chancellor McCormick noted the college was able to adapt and adjust to major changes in the aviation industry and has made a remarkable turnaround in that program area.

President Temte said the college’s Aviation Maintenance Program has been awarded an American Recovery and Reinvestment Act grant of $5 million, allocated over the next three years. It will be used to establish an Unmanned Aircraft Systems Maintenance Training Center, the first of its
This grant will position the college to be at the forefront of this developing industry, along with partners at the University of North Dakota and the Grand Forks Air Force Base, President Temte said. With the aviation maintenance expertise at the airport site in Thief River Falls, the region will become a leader in the emerging technology of remotely piloted aircraft.

_A motion was made by Trustee Van Houten and seconded by Trustee Sundin that the Academic and Student Affairs Committee recommends that the Board of Trustees approve the request by Northland Community and Technical College to reaffirm its vision, mission, purposes and array of awards as listed in the executive summary. Motion carried._

- **Minnesota State College – Southeast Technical**
  
  **Presenter:** Jim Johnson, President

  **College vision:** Shaping the workforce by providing quality education for today and tomorrow.

  **College mission:** Minnesota State College – Southeast Technical is dedicated to providing education for employment, skill enhancement, and retraining. The primary focus is to anticipate and meet the educational and training needs of students and employers.

  Minnesota State College – Southeast Technical provides students with a strong foundation of general and technical educational opportunities for acquiring knowledge, skills and attitudes for a lifetime of learning. The college anticipates and responds to global, technological and social changes.

  Minnesota State College – Southeast Technical provides equal opportunity and recognizes individual needs in its education, service and employment practices. Certificates, Diplomas, Associate in Science and Associate in Applied Science Degrees are awarded upon successful completion.

  **Discussion:**
  President Johnson said the college’s mission and vision statements are not changing. The college will continue to concentrate on being a leader in technical education and because of partnerships with other system institutions, he doesn’t foresee a need for the college to become a comprehensive college.

  Technical colleges such as Minnesota State College – Southeast Technical have benefitted from being in a merged system, President Johnson said.
The merger allows technical colleges to be treated equally in the higher education community.

The college’s growth took off when the effort was made to align the college strategic goals with the strategic goals of the system, President Johnson said. There was a 21 percent growth in enrollment last year and an additional 4 percent this year.

Trustee Van Houten noted males make up only 37 percent of the student population at Minnesota State College – Southeast Technical and asked why the figure is so low. President Johnson said this is a trend throughout the higher education community. Part of the reason may be that the college has strong allied health education programs which tend to attract more females than males.

A motion was made by Trustee Benson and seconded by Trustee Renier that the Academic and Student Affairs Committee recommends that the Board of Trustees approve the request by Minnesota State College – Southeast Technical to reaffirm its vision, mission, purposes and array of awards as listed in the executive summary. The motion carried, with one abstention from Trustee Van Houten, who said he would like the issue of technical college mission changes to be discussed again by the Board of Trustees and handled in a more strategic manner.

5. 2009-2010 Honorary Degrees Report

The annual report on honorary doctorates awarded in fiscal year 2010 was presented.

Two honorary degrees were awarded:

- Gordon Viere, CEO of LarsonAllen, was presented an honorary Doctorate of Business Administration by St. Cloud State University. LarsonAllen is one of America’s 20 largest accounting and consulting firms and Viere was granted the doctorate in recognition of achievement and outstanding success in his professional and personal life.

- Shigeko Sasamori was awarded an Honorary Doctorate of Humane Letters from Winona State University. Ms. Sasamori is a survivor of the Hiroshima bombing and was recognized for her commitment to promoting worldwide peace.

6. Discuss and Select Committee Goals

Chair Thiss sought input from each trustee concerning key issues or ideas that the Board of Trustees might consider and discuss during the fiscal year. In August, the committee refined and sorted a list of ideas and got feedback from the Leadership Council. Two goals for inclusion in its work plan were identified:
moving responsibility for remedial education to two-year colleges; and studying a
12-month academic calendar and a three-year baccalaureate program.

Chair Rice said the selection of these two goals does not mean that the committee
can’t discuss or act on other goal suggestions, such as making college readiness
expectations clear to prospective students.

Trustee Englund asked how much remedial education currently is done at
universities.

President Hammersmith said Metropolitan State University, for example, does not
offer remedial courses. Students go to two-year colleges for developmental
coursework.

Interim Vice Chancellor Olson said staff could obtain information on the status of
remedial education at universities and report back to the Board.

Trustee McElroy asked if students needing developmental coursework could
obtain it through adult basic education programs. This may be a less-expensive
way for students to receive this type of coursework, he said.

A motion was made by Trustee Benson and seconded by Trustee Sundin that the
Academic and Student Affairs Committee recommends that the Board of Trustees
approves the following goals that will be added to the committee’s FY 2011 work
plan:

- Study the pros and cons of moving responsibility for remedial education
  from the universities to the colleges and make a decision on
  implementation by June 21, 2011; and
- Study the pros and cons of implementing a 12-month academic calendar
  and a three-year baccalaureate program and make a decision on
  implementation by June 21, 2011.

7. 60/120 Credit Length Legislative Report

By October 1, 2010, the Board of Trustees must provide a report to the
Legislature providing information about the status of program credit length
reductions and the disposition of waiver applications submitted during FY 2010.

Laws passed in recent years affect the length of selected degree programs. The
maximum number of semester credits required for a baccalaureate degree must be
120 credits by June 2012. The maximum credits in an associate degree must be
60 credits by that date.

The law permits the board to grant waivers for specific degree programs in which
industry or professional accreditation standards require a greater number of
credits.
During FY 2010, 327 degree programs reduced credit lengths to 60/120 and now 87 percent of the degree programs are now in compliance with Minnesota statute and Chancellor’s policy and procedure.

Six waiver applications pertaining to engineering programs were submitted and approved. During 2011 and 2012, group waivers applications are expected in areas such as law enforcement, health care and teaching programs.

Interim Vice Chancellor Olson said students in programs, such as engineering, need to have additional coursework to meet national accreditation standards. Extra coursework may be necessary in some areas of teacher education as well.

Chair Rice asked why some state universities offer associate degrees.

Associate Vice Chancellor Manuel López said historically no community colleges were located in the same community as a state university. This caused some universities to begin to offer associate of arts and associate of applied science degrees to serve more students in each university’s service area. Few associate degrees are awarded by universities today, he said.

Trustees discussed if this is something that should be promoted. Trustee McElroy pointed out students possibly could earn an associate’s degree, even if they leave the university before earning enough credits for a baccalaureate degree. This would help improve institutional graduation rates, he said. People with degrees tend to be more employable and earn higher wages, he added.

President Hammersmith said universities offering associate degrees are more common in states that do not have a strong community college network. Associate degrees would often be aimed at students interested in transferring to a specialty program, such as veterinary medicine, at another school. These degrees also could be appealing to students who not only want a two-year degree, but also a university experience, such as living in a campus residence hall.

Interim Vice Chancellor Olson said this topic is something the committee could discuss in the future.

The meeting adjourned at 2:35 pm
Respectfully submitted,
Margie Takash, Recorder
MINNESOTA STATE COLLEGES AND UNIVERSITIES
BOARD OF TRUSTEES

Agenda Item Summary Sheet

Committee: Academic and Student Affairs       Date of Meeting: November 16, 2010

Agenda Item: Mission Reaffirmations: Bemidji State University; Minnesota State University, Mankato

☐ Proposed Policy Change  ☑ Approvals Required by Policy  ☐ Other Approvals  ☐ Monitoring

☐ Information

Cite policy requirement, or explain why item is on the Board agenda:

Board Policy 3.24 System and College and University Missions, Part 4: Review and Approval of College and University Mission and Vision Statements requires institutions to have their missions approved by the Board at least once every five years.

Scheduled Presenter(s):

Richard Hanson, President, Bemidji State University
Richard Davenport, President, Minnesota State University, Mankato

Outline of Key Points/Policy Issues:

The vision, mission and purposes presented by Bemidji State University reaffirm the institutional mission approved by the Board of Trustees in 1998. The reaffirmed statements meet the criteria identified in Board Policy 3.24 System and College and University Missions, Part 4: Review and Approval of College and University Mission and Vision Statements.

The vision, mission and purposes presented by Minnesota State University, Mankato reaffirm the institutional mission approved by the Board of Trustees in 1996. The reaffirmed statements meet the criteria identified in Board Policy 3.24 System and College and University Missions, Part 4: Review and Approval of College and University Mission and Vision Statements.
Executive Summary

The vision, mission and goals of Bemidji State University meet the criteria identified in Board Policy 3.24 System and College and University Missions, Part 4: Review and Approval of College and University Mission and Vision Statements. The university is reaffirming its mission (previously approved by the Board of Trustees in September 1998) under the new Board policy requirement that colleges and universities seek Board approval at least once every five years.

Bemidji State University’s vision, mission, purposes and array of awards are:

Vision: Shaping Potential, Shaping Worlds: Bemidji State University is a catalyst for shaping the potential of those it serves, who in turn, shape the worlds in which they live and work.

Mission: Engage. Embrace. Educate. As northern Minnesota’s university, we engage in new worlds of thought, embrace responsible citizenship, and educate for a future that can only be imagined.

Purpose 1: Engage Students for Success in Careers, Communities and Life
Strategic Imperative: Create opportunities for student success through high quality programs and services. Value Statement: Bemidji State recognizes the value of higher education as a public good, provides student-centered access to learning, meets the needs of our diverse, rural and nontraditional students, and promotes lifelong learning.

Purpose 2: Promote Vital Communities through Involvement
Strategic Imperative: Support and promote community vitality through Bemidji State’s commitments within our local, regional, national and world spheres. Value Statement: Bemidji State values the supportive relationships between the university and its communities.

Purpose 3: Innovate for a Changing World
Strategic Imperative: Accommodate change through an organizational culture of creativity, innovation and planning. Value Statement: Bemidji State values flexibility and adaptability as a means to change.

Purpose 4: Optimize Resources to Achieve the University’s Vision and Mission
Strategic Imperative: Effectively manage and increase enrollment and resources in support of the university’s vision and mission. Value Statement: Bemidji State recognizes and honors the role of the university in the stewardship of its resources and the importance of accountability.

**Purpose 5: Execute the Recalibration of Bemidji State University**

Strategic Imperative in dealing with the projected budgetary problem in the 2012-13 biennium:
- To *preserve* our capacity to create *transformational* learning environments
- To *realign* our institution to *sharpen* our educational focus
- To be *richly innovative* in improving our *capacity to keep improving* what we do

**Array of Awards:** The *array of awards* offered by Bemidji State University includes Associate degrees; Baccalaureate degrees; Master’s degrees; Pre-professional programs of study and Certificate programs.

**BACKGROUND**

Minnesota’s state legislature chartered Bemidji State University as Bemidji Normal School in 1919. The intent was to train public school teachers for rapidly expanding communities in northern Minnesota. Initial enrollment was 38 students. Today the university offers approximately 65 baccalaureate and 14 graduate degrees and enrolls an average of 5,000 students annually, including in teacher training programs. Service to the Bemidji area and the northern tier of Minnesota continues to be a focus of the university even while it extends its reputation statewide, nationally and internationally. Situated near the fledgling Mississippi River, just 41 road miles (62 river miles) from the Headwaters, the city of Bemidji serves a population of nearly 15,000 and provides educational, medical, commercial and governmental services to a regional population of over 30,000. Three American Indian tribal communities, Leech Lake, Red Lake and White Earth, lie within a 75 mile radius of Bemidji.

Bemidji State shares many services with Northwest Technical College, also located in the City of Bemidji. For example, Bemidji State offers NTC learners reserved seats in certain designated classes, resident housing, health care, and access to campus events. Administrative systems, such as Records, Financial Aid and Purchasing, are operated primarily from the university campus but are shared across the two institutions. Bemidji State’s president serves as president of NTC. NTC, however, remains a separately accredited college.

In its 90 year history, Bemidji State has evolved from a teacher-training institution to a university:

- 1919 Bemidji Normal School
- 1921 Bemidji State Teachers College
- 1957 Bemidji State College
- 1975 Bemidji State University

Bemidji State University just completed a site visit (Spring 2010) for continuing accreditation by the Higher Learning Commission. The visiting team completed their work, with a follow-up
recommendation for continuing work on assessment of outcomes, and the report was approved by the internal mechanisms of the HLC. We have already started the processes necessary to follow-up on the recommendations of the visiting team. With reaccreditation complete, the next HLC evaluation will occur in 10 years.

OVERVIEW OF MISSION, VISION AND PURPOSES
The proposed vision, mission, and purposes of Bemidji State University meet the criteria identified in Board Policy 3.24 System and College and University Missions, Part 4: Review and Approval of College and University Mission and Vision Statements.

As required by procedure, the institution must:

A. Describe how its mission and vision align with the requirements in Policy 3.24;
B. Articulate how the college or university will meet expectations of law, how it relates to other institutions of higher education, and how its mission, vision, and purposes support fulfillment of the system mission and vision;
C. Describe the array of awards it offers;
D. Include a statement that the college or university mission is compliant with statute, policy, and regional accreditation requirements; and
E. Describe consultation with faculty and staff, students, employers and other essential stakeholders.

Additionally, the institution’s mission must be compliant with statute, policy, and regional accreditation requirements.

REVIEW OF BEMIDJI STATE UNIVERSITY’S MISSION, VISION AND PURPOSES

The mission, vision, and purposes respond to the system procedure. Bemidji State University’s vision, mission, and purposes are consistent with statute, policy, and regional accreditation requirements. The College mission, vision, and purposes demonstrate alignment with the system mission and vision.

The university is reaffirming an institution mission that was approved by the Board in September, 1998.

The mission of Bemidji State University is “Engage. Embrace. Educate. As northern Minnesota’s university, we engage in new worlds of thought, embrace responsible citizenship, and educate for a future that can only be imagined.”

As northern Minnesota’s university, Bemidji State University serves undergraduate students from the state of Minnesota and from at least 34 other states in the U.S. It serves almost 300 international students and nearly 200 Native American students from several tribes in the upper Midwest. BSU serves the community of Bemidji as a partner in community and economic development, as a partner in neighborhood revitalization and as a partner in manufacturing and industry development. Bemidji State University serves the mission of graduate education with several high quality masters degrees programs.

The university strives for outcomes that support the ways in which it:
- shapes individuals and thus shapes worlds;
- engages students in thinking and creativity;
- embraces notions of responsible citizenship, from the personal world to the global world; and
- educates students for thinking toward the future—a collective act of the imagination.

Bemidji State University exists to provide transformational learning environments that create the following personal strengths (for our students), institutional strengths (for BSU), and community strengths (for our region, for the state and for the expanded reach of the institution):

- Sustainability – The university’s programs and services will: comply with system, state, and federal regulations; provide academic and monetary resources sufficient to ensure sustainability well into the future; meet the learner’s and university’s needs of the present without compromising the capacity of the institution to meet the needs of future generations; and use assessment information for continuing improvement.
- Innovation – The university will apply new methods, ideas, significant new elements of “innovativeness” to attract and retain learners; offer unique and demanding programs and services within higher education and/or within a discipline and produce new and unique routines, outcomes or processes.
- Distinctiveness – The university’s programs and services will: encompass and express/project the unique academic, social and economic characteristics of the institution to the world; present a world richly understood and intensely explored; operationalize the idea that “learning should be an act of discovery,” have or give style or distinction locally and regionally and stand above other similar programs in other universities or colleges.

The university mission supports the system mission in the following ways:
The university’s mission statement identifies the actions that carry out values expressed in the vision. It explains the ways in which the university shapes individuals and thus shapes worlds: we engage students in thinking and creativity; we embrace notions of responsible citizenship, from the personal world to the global world; and we educate students for thinking toward the future—a collective act of the imagination. The use of verbs in the mission statement is intentional: Bemidji State University is a university of action.

Bemidji State’s Signature Themes support the university’s mission and help focus efforts to move toward a more intentional university culture.

Students, through the sum of their educational experience at Bemidji State, will have multiple opportunities to learn about, experience, and reflect on the university’s Signature Themes. The themes represent core values that guide curriculum and services. Not tightly defined, they invite interpretation and discovery.

- **International/Multicultural understanding** (System Strategic Direction: 1.2, 2.2, 3.3)
- **Civic engagement** (System Strategic Direction: 1.2, 3.2, 3.3)
- **Environmental stewardship** (System Strategic Direction: 2.2, 3.2, 3.3)
The university values diversity in myriad forms: it values actions by individuals who shape the worlds they inhabit and for which they are responsible; it values the Earth we live on and accepts responsibility for its health and well-being.

These values fire the imagination and lead to action. They are the passion that fuels change; that shapes potential and worlds.

The Center for Professional Development supports faculty excellence through its services. These include provision of mid-term and end-of-term course evaluations, observation of and feedback for instructors, programs, forums and a library of higher education resources. The Center’s web site offerings include white papers, a template for syllabi, instructor evaluation forms, guides for department chairs and a handbook for adjuncts. As noted above, the university supports the CPD with three credits of reassigned time per semester for the CPD director and with an annual programming budget.

Bemidji State participates in faculty professional development opportunities provided by the system. The Center for Teaching and Learning regularly offers programming on learning and teaching.

Bemidji State offers students preparation in traditional liberal studies programs, such as those in the College of Arts & Sciences, and in its select professional programs, such as those in the College of Business, Technology & Communication and the College of Health Sciences & Human Ecology. No one program dominates the academic landscape at Bemidji State. Rather, each of the three colleges is home to several distinctive programs.

By way of example:

- College of Arts & Sciences: Bachelor of Fine Arts in Creative and Professional Writing, the first BFA in writing in Minnesota and recipient of a system award “in recognition of outstanding educational achievement 2006 Excellence in Curriculum Programming.”
- College of Business, Technology & Communication: 360 Degrees, a system Center of Excellence in Manufacturing and Applied Engineering.
- College of Health Sciences & Human Ecology: Nursing four-year degree, built on extensive needs assessment and collaboration with community health partners.

Program Distinctiveness and Accreditations: Bemidji State assures learning and teaching excellence through distinctive, excellent programs. The university’s curriculum process is rigorous, as are five-year program reviews and assessments.

In addition to institutional accreditation with the Higher Learning Commission, six of Bemidji State’s programs are accredited by national agencies:

- Accounting and Business Programs: International Assembly for Collegiate Business Education
- Chemistry Program: American Chemical Society
- Industrial Technology Programs: The Association of Technology, Management, and Applied Engineering (formerly National Association of Industrial Technology Board of Accreditation)
- Music Program: National Association of Schools of Music
• Nursing Program: Commission on Collegiate Nursing Education
• Social Work Program: Council of Social Work Education

Programs that are especially distinctive in nature, many with a focus on online and online/hybrid formats, include the following:

• Bachelor of Applied Science in Applied Engineering (online)
• Bachelor of Applied Science in Technology Management (online)
• Bachelor of Fine Arts in Creative and Professional Writing
• Bachelor of Science in Nursing
• RN to Baccalaureate - blended format nursing program in cooperation with Anoka Ramsey Community College, Cambridge
• Bachelor of Science in Accounting (online)
• Bachelor of Science in Business Administration (online)
• Bachelor of Science in Criminal Justice (online)
• Bachelor of Science in Teacher Education, Distributed Learning in Teacher Education (DLiTE) (online/hybrid)
• Portfolio Teaching Certification (FasTrack) (online/hybrid)

The vision for Bemidji State University states “Shaping Potential, Shaping Worlds: Bemidji State University is a catalyst for shaping the potential of those it serves, who in turn, shape the worlds in which they live and work.”

The ideal future for Bemidji State University is recognized in its mission statement that Bemidji State University turns its attention toward “a future that can only be imagined” and the recognition that a primary responsibility of higher education today is to prepare students not only for immediate careers, rich personal lives and citizenship, but for the entire arc of their life journeys. The university’s Student Development & Enrollment Master Plan reflects the breadth and depth of that challenge, and guides programs, services and staff in efforts to meet the challenges of a thousand unpredictable tomorrows.

The plan confirms the university’s commitment to student access and success and aligns with the System’s Strategic Directions 1 and 2:

1. Support and promote students’ learning. Self-confidence, self-reliance and responsibility for self lie close to the heart of academic success.
2. Support and promote students’ personal well-being. Personal wellness has many facets, including physical competence, emotional intelligence, a sense of geographic place, spirituality, life-style balance, and a positive sense of self and well-being.
3. Challenge and support, i.e., empower, students as they navigate their journey. The constant for the future is change. In addition to being prepared for careers and graduate study, students who are ready for the future will have knowledge and skills that prepare them to be effective in team work, to think critically and to discern values.
4. Ensure ease of access to the university and to campus services and programs. By leading, initiating, intervening, following through, reaching out and networking, Student Development & Enrollment advocates - makes things happen - for students.

The stated purposes of Bemidji State University are:

**Purpose 1: Engage Students for Success in Careers, Communities and Life**
Strategic Imperative: Create opportunities for student success through high quality programs and services. Value Statement: Bemidji State recognizes the value of higher education as a public good, provides student-centered access to learning, meets the needs of our diverse, rural and nontraditional students, and promotes lifelong learning. (System Strategic Direction Alignment: 1.1, 1.4, 2.1, 2.2)

**Purpose 2: Promote Vital Communities through Involvement**
Strategic Imperative: Support and promote community vitality through Bemidji State’s commitments within our local, regional, national and world spheres. Value Statement: Bemidji State values the supportive relationships between the university and its communities. (System Strategic Direction Alignment: 1.2, 1.4, 2.2, 2.3, 3.1, 3.2, 3.3)

**Purpose 3: Innovate for a Changing World**
Strategic Imperative: Accommodate change through an organizational culture of creativity, innovation and planning. Value Statement: Bemidji State values flexibility and adaptability as means to change. (System Strategic Direction Alignment: 4.1, 4.2, 4.3)

**Purpose 4: Optimize Resources to Achieve the University’s Vision and Mission**
Strategic Imperative: Effectively manage and increase enrollment and resources in support of the university’s vision and mission. Value Statement: Bemidji State recognizes and honors the role of the university in the stewardship of its resources and the importance of accountability. (System Strategic Direction Alignment: 1.4, 5.1, 5.2, 5.3)

**Purpose 5: Execute the Recalibration of Bemidji State University**
Strategic Imperative in dealing with the projected budgetary problem in the 2012-13 biennium:
- To preserve our capacity to create transformational learning environments
- To recalibrate our institution to sharpen our educational focus
- To be richly innovative in improving our capacity to keep improving what we do
(System Strategic Direction Alignment: 1.1, 1.4, 2.1, 2.2, 3.2, 3.3, 4.2, 4.3, 4.4, 5.1, 5.3)

The array of awards offered by Bemidji State University includes an associate degree; baccalaureate degrees; master’s degrees; specialist degrees; applied doctoral degrees; pre-professional programs of study and certificate programs.

**RECOMMENDED COMMITTEE MOTION**

The Academic and Student Affairs Committee recommends that the Board of Trustees approves the request by Bemidji State University to reaffirm its vision, mission, purposes, and array of awards as listed in the executive summary.
RECOMMENDED MOTION

The Board of Trustees approves the request by Bemidji State University to reaffirm its vision, mission, purposes, and array of awards as listed in the executive summary.
EXECUTIVE SUMMARY

The vision, mission and goals of Minnesota State University, Mankato meet the criteria identified in Board Policy 3.24 System and College and University Missions, Part 4: Review and Approval of College and University Mission and Vision Statements. The university is reaffirming its mission (previously approved by the Board of Trustees in September 1996) under the new Board policy requirement that colleges and universities seek Board approval at least once every five years.

Minnesota State University, Mankato’s vision, mission, purposes and array of awards are:

Vision: Minnesota State University, Mankato will be known as a university where people expect to go further than they thought possible by combining knowledge and the passion to achieve great things. Our foundation for this vision is our heritage of both dedicated teaching and the direct application of knowledge to improve a diverse community and world. We will achieve it by actively nurturing the passion within students, faculty and staff to push beyond possibility on the way to realizing dreams.

Mission: Minnesota State University, Mankato promotes learning through effective undergraduate and graduate teaching, scholarship, and research in service to the state, the region and the global community.

Purpose 1  The University will foster an actively engaged and inclusive learning community based upon civility, trust, integrity, respect, and diversity in a safe, welcoming physical environment.

Purpose 2  The University will prepare students for careers and for life-long learning by providing a clearly defined general education program and focused undergraduate pre-professional, professional, and liberal arts programs.

Purpose 3  The University will strengthen its role as a major provider of graduate education, offering intensive, scholarly graduate programs including collaborative efforts with other institutions and professionals, culminating in student expertise at professional levels.
**Purpose 4** The University will enhance advising, support services, and learning experiences that aid students in identifying life goals, planning academic careers, and achieving timely graduation.

**Purpose 5** The University will increase the quantity and quality of service to the state, region, and global community through collaboration, partnerships, and opportunities for cultural enrichment and continuous learning.

**Purpose 6** The University will invest in the professional development of all members of the University Community and in the appropriate technologies necessary to achieve excellence in learning through teaching, research, and service.

**Purpose 7** The University, as a whole and in all of its parts, will establish priorities through planning and assessment processes that anticipate our needs and focus our efforts and resources in support of our mission and goals.

**Array of Awards:** The array of awards offered by Minnesota State University, Mankato includes an Associate Degree; Baccalaureate degrees; Master’s degrees; Specialist degree; Doctoral degrees; Pre-professional programs of study and Certificate programs.

**BACKGROUND**

Minnesota State University, Mankato’s beginnings can be traced to a Mankato attorney who, in 1867, persuaded the Minnesota Legislature to authorize the city of Mankato to sell bonds for the $5,000 required to open the state’s second normal school. He promised Mankato citizens that if they would support the school, “untold benefits would be repaid tenfold for every dollar invested.”

Mankato Normal School opened in 1868 with 27 students. Tuition was free in return for a pledge to teach two years in Minnesota schools. Old Main was constructed in 1870, beginning the Valley Campus that would serve the institution for over a century. The institution expanded and the curriculum grew. In 1921, the school became Mankato State Teacher’s College, and in 1927, the first four-year degree (a bachelor of education) was awarded.

In the late 1950’s, the college was renamed Mankato State College to reflect its expanding curriculum. At the same time, the college was outgrowing the Valley Campus and construction began on a parcel of land named the Highland Campus.

In 1975 full university status was accorded and four years later, the Valley Campus closed and all activities consolidated on the Highland Campus. In September 1998, the Board of Trustees approved a name change, and Mankato State University became Minnesota State University, Mankato to reflect its expanded role in the state and region.

The Higher Learning Commission completed a comprehensive evaluation during the 2005-2006 academic year. Prior to the site visit, the university had completed a self-study which included consultation with faculty, staff, students, community members and other stakeholders regarding
the University's mission. Minnesota State University, Mankato was reaccredited by the Higher Learning Commission for a ten year period. The next comprehensive evaluation is scheduled for the 2015-2016 academic year.

OVERVIEW OF MISSION, VISION AND PURPOSES
The proposed vision, mission, and purposes of Minnesota State University, Mankato meet the criteria identified in Board Policy 3.24 System and College and University Missions, Part 4: Review and Approval of College and University Mission and Vision Statements.

As required by procedure, the institution must:
A. Describe how its mission and vision align with the requirements in Policy 3.24;
B. Articulate how the college or university will meet expectations of law, how it relates to other institutions of higher education, and how its mission, vision, and purposes support fulfillment of the system mission and vision;
C. Describe the array of awards it offers;
D. Include a statement that the college or university mission is compliant with statute, policy, and regional accreditation requirements; and
E. Describe consultation with faculty and staff, students, employers and other essential stakeholders.

Additionally, the institution’s mission must be compliant with statute, policy, and regional accreditation requirements.

REVIEW OF MINNESOTA STATE UNIVERSITY, MANKATO’S MISSION, VISION AND PURPOSES/GOALS
The mission, vision, and purposes respond to the system procedure. Minnesota State University, Mankato’s vision, mission, and purposes are consistent with statute, policy, and regional accreditation requirements. The College mission, vision, and purposes demonstrate alignment with the system mission and vision.

The university is reaffirming an institution mission that was approved by the Board in September, 1996.

The mission of Minnesota State University, Mankato, is “Minnesota State University, Mankato promotes learning through effective undergraduate and graduate teaching, scholarship, and research in service to the state, the region and the global community.”

Minnesota State University, Mankato serves the people of Minnesota, the Midwest region and the global community.

The university provides effective undergraduate and graduate learning experiences in the classroom through faculty who engage in scholarly activities and provide research opportunities (primarily in applied research) for faculty and students.
The university provides higher education to prepare students for careers and for life-long learning, and as a major provider of graduate education, additionally conducts research that benefits mankind.

The university mission supports the system mission in the following ways:

- Being a distinct institution that collaborates with others in the system
- Meeting personal and career goals of a wide range of individual learners
- Enhancing the quality of life through scholarly and creative pursuits
- Partnering with business, industry, government, and non-profit organizations in research opportunities to sustain economies

Minnesota State University, Mankato is a leader in the Minnesota State Colleges and Universities system in providing quality undergraduate programs as well as a growing graduate school that includes 4 applied doctoral programs. With more than 150 undergraduate programs of study and more than 100 graduate programs, the University’s learning is structured in six academic colleges and the graduate college. The University is expanding off campus outreach through its 7700 France Avenue site in Edina and through online programs. Several centers provide research opportunities and the University collaborates with its partner colleges in the Minnesota Center for Engineering and Manufacturing Excellence. Our academic quality is recognized by 24 regional or national accrediting agencies, including the Higher Learning Commission. Our most popular programs are elementary education, physical education, biology, law enforcement, management (business) and psychology.

The vision for Minnesota State University, Mankato states that “Minnesota State University, Mankato will be known as a university where people expect to go further than they thought possible by combining knowledge and the passion to achieve great things. Our foundation for this vision is our heritage of both dedicated teaching and the direct application of knowledge to improve a diverse community and world. We will achieve it by actively nurturing the passion within students, faculty and staff to push beyond possibility on the way to realizing dreams.”

To achieve this vision, Minnesota State University, Mankato will provide high quality learning experiences for students so that they can achieve more than they thought possible. This enthusiasm (passion) for learning and discovery will permeate the campus. Our graduates will be leaders in their communities and professions. So that passion and learning can be nurtured, there will continue to be an emphasis on providing collaborative learning areas – whether in academic, administrative or student buildings. There will be additional learning communities within the residence halls. Research opportunities will continue to grow as will our graduate, doctoral, extended learning, and online areas.

Our campus culture wishes to excel. We desire as a university to be among the very best. We set stretch goals and achieve them. We want our students to be prepared for leadership roles. We encourage scholarly, creative, and research activities. We provide opportunities for our faculty to become better teachers. We seek out diversity, and our retention rates for underrepresented populations are among the highest in the system. We want to be a Great Place to Work and are striving to achieve this goal.
The university’s vision for itself is consistent with the vision for the Minnesota State Colleges and Universities system:

- Desire for student success
- Access for diverse groups
- Impact on the quality of life beyond state boundaries

The university’s strategic priorities align with system goals in the following ways:

- We will plan and build the Campus of the Future (Strategic Direction 1,2,3,4,5)
- We will think and act like a Doctoral Institution (Strategic Direction 2,4)
- We will grow Extended Learning (Strategic Direction 1,2,3,4)
- We will promote Global Solutions (Strategic Direction 1,2,3)
- We will embody Quality and Excellence in all that we do (Strategic Direction 2)

The stated purposes of Minnesota State University, Mankato are:

**Purpose 1** The University will foster an actively engaged and inclusive learning community based upon civility, trust, integrity, respect, and diversity in a safe, welcoming physical environment.

**Purpose 2** The University will prepare students for careers and for life-long learning by providing a clearly defined general education program and focused undergraduate pre-professional, professional, and liberal arts programs.

**Purpose 3** The University will strengthen its role as a major provider of graduate education, offering intensive, scholarly graduate programs including collaborative efforts with other institutions and professionals, culminating in student expertise at professional levels.

**Purpose 4** The University will enhance advising, support services, and learning experiences that aid students in identifying life goals, planning academic careers, and achieving timely graduation.

**Purpose 5** The University will increase the quantity and quality of service to the state, region, and global community through collaboration, partnerships, and opportunities for cultural enrichment and continuous learning.

**Purpose 6** The University will invest in the professional development of all members of the University Community and in the appropriate technologies necessary to achieve excellence in learning through teaching, research, and service.

**Purpose 7** The University, as a whole and in all of its parts, will establish priorities through planning and assessment processes that anticipate our needs and focus our efforts and resources in support of our mission and goals.

Examples of how the Minnesota State Mankato purposes are supporting the mission and goals of the Minnesota State Colleges and Universities system include:
• Provides accessible higher education for a diversity of individual learners
• Prepares students to succeed
• Offers higher education that meets the personal and career goals of individual learners
• Enhances the quality of life through collaborations, partnerships and opportunities for cultural enrichment and continuous learning

The array of awards offered by Minnesota State University, Mankato includes an associate degree; baccalaureate degrees; master’s degrees; specialist degrees; applied doctoral degrees; pre-professional programs of study and certificate programs.

The university offers more than 150 undergraduate programs of study, including 16 pre-professional, seven certificate, one associate and 127 bachelor’s degree programs. More than 100 graduate programs include master’s, specialist, certificate and 4 applied doctoral programs.

RECOMMENDED COMMITTEE MOTION

The Academic and Student Affairs Committee recommends that the Board of Trustees approves the request by Minnesota State University, Mankato to reaffirm its vision, mission, purposes, and array of awards as listed in the executive summary.

RECOMMENDED MOTION

The Board of Trustees approves the request by Minnesota State University, Mankato to reaffirm its vision, mission, purposes, and array of awards as listed in the executive summary.
As part of its FY2011 work plan, the Academic and Student Affairs Committee will study and consider implementation of these goals: implementation of three-year baccalaureate degree programs and a 12-month calendar in the Minnesota State Colleges and Universities system; and moving responsibility for remedial education from the universities to the colleges.

Scheduled Presenter(s):

Scott Olson, Interim Senior Vice Chancellor for Academic and Student Affairs

Outline of Key Points/Policy Issues:

The Office of the Chancellor’s understanding of the study objectives and plans to support the work of the committee are presented for review.

Background Information:

This study addresses progress on committee goals on the FY2011 work plan of the Academic and Student Affairs Committee. The goals are:

- Study the pros and cons of implementing a 12-month calendar and a three-year baccalaureate program;
- Study the pros and cons of moving responsibility for remedial education from the universities to the colleges.
BACKGROUND

On September, 15, 2010, the Board of Trustees approved the following goals in the FY2011 work plan of the Academic and Student Affairs Committee:

- Study the pros and cons of implementing a three-year baccalaureate program and a 12-month calendar and make a decision on implementation by June 21, 2011.
- Study the pros and cons of moving responsibility for remedial education from the universities to the colleges and make a decision on implementation by June 21, 2011.

The Office of the Chancellor’s understanding of the study objectives and plans to support the work of the committee are presented for review.

Three-Year Baccalaureate and Twelve-Month Calendar

STUDY PROCESS

With the advice of an ad hoc advisory committee, the Office of the Chancellor will identify the implications of three-year baccalaureate programs and 12 month academic calendars and prepare materials for the Board’s Academic and Student Affairs committee that outline issues and options before the system.

Based on the study findings and consultation, the Interim Senior Vice Chancellor will make recommendations to the Academic and Student Affairs Committee on whether to proceed with development of a three-year baccalaureate degree program and/or a 12 month academic calendar. Recommendations will be presented for review at the May, 2011 committee meeting and possible action by the Board in June, 2011.

The Academic Programs and Research, Planning and Effectiveness units in Academic and Student Affairs will lead work within the Office of the Chancellor.
ASSUMPTIONS
A 12 month calendar and a three-year baccalaureate program are related, but separate, issues to be studied and considered by the Board.

Three-Year Baccalaureate Program
- A three-year baccalaureate program might or might not require attendance year round; a 12 month calendar is not assumed to be a necessary condition for offering degrees that can be completed in three years of enrollment in post-secondary education.
- A three-year baccalaureate program would be an option available to undergraduate students on a voluntary basis.
- A three-year baccalaureate program would include the same learning outcomes and academic requirements as traditional baccalaureate programs, but program delivery would be designed to allow completion within a shorter elapsed time.
- The system’s approach to a three-year baccalaureate could incorporate opportunities for high school students to begin to fulfill requirements for their bachelor’s degrees. It would not, however, depend on fundamental, widespread changes in K-12 education such as reforms that would mirror the European higher education structure under the Bologna Process.
- The study will address pros, cons and other implications of adopting different three-year baccalaureate degree models. It will result in recommendations on whether and how the system should proceed to facilitate three-year baccalaureate degree programs. If the Board chooses to pursue a three-year degree option, further work would follow to design and implement programs at the state universities.

12 Month Academic Calendar
- While a 12 month calendar could improve opportunities for earning a baccalaureate degree in less than four years, it could also provide benefits other than early graduation.
- A 12 month academic calendar might consist of three semesters of equal or similar length but other approaches may be feasible or preferable.
- Participation in a 12 month calendar would be an option for students.
- Piloting this approach at one institution could be part of the study of the pros and cons of such an approach.

PRELIMINARY STUDY TOPICS
Topics addressed in the study will emerge during research and consultation but are expected to include the following:
- National context and the rationale for accelerated degree programs and year round calendars
- Models of three-year baccalaureate programs and 12 month calendars operating in other institutions and pros, cons and other implications of these approaches
- Current early graduation rates and supports that allow students to earn a baccalaureate degree in three years within Minnesota State Colleges and Universities
- Summer sessions now offered by Minnesota State Colleges and Universities
• Implications of delivering structured three-year baccalaureate opportunities and 12 month academic calendar options in Minnesota State Colleges and Universities
  o Potential benefits to students and institutions
  o Concerns of students and institutions
  o Most promising curricular and delivery models
  o Student demand
  o State university and college roles
  o Eligible students and programs
  o Resource requirements
  o Information technology support
  o Impacts of Federal and state legislation, Board policy, accreditation requirements and collective bargaining agreements on implementation

Moving Remedial Education to Colleges

STUDY PROCESS

With the advice of an ad hoc advisory committee, the Office of the Chancellor will identify the cost savings and other benefits, as well as the potential risks and disadvantages, of moving all remedial coursework from the state universities to the colleges. The advisory committee will also study alternative methods of delivering remedial education. A report will be prepared for the Board’s Academic and Student Affairs committee outlining the options for delivering remedial education and the benefits and disadvantages of having all remedial education delivered by the colleges.

Based on the study findings and consultation, the Interim Vice Chancellor for Academic and Student Affairs will make recommendations to the Academic and Student Affairs Committee on whether to proceed with moving all remedial education to the colleges and on the delivery of remedial education using alternative methods. Recommendations will be presented for review at the May, 2011 committee meeting and possible action by the Board at the meeting in June, 2011.

Staff support for the study will be provided by the Student Affairs unit in Academic and Student Affairs with assistance from the Academic Programs and the Research, Planning and Effectiveness units.

ASSUMPTIONS

- The Board’s interest in the feasibility of moving remedial education to the colleges is founded on a motivation for efficiency and effectiveness in the delivery of remedial education.
- Current state university admission requirements would not be changed under a plan to eliminate remedial courses from the state university curriculum.
- The study will address the advantages and disadvantages of different models and methods of providing remedial education to state college students. Based on the results of the study and the advice of the ad hoc advisory group, the Interim Vice Chancellor will
provide recommendations on whether the system should consider adoption of any of these alternative methods. If the Board decides that one or more of these methods should be adopted, additional work will follow.

- Adoption of alternative methods of providing remedial education may require changes to the collective bargaining agreement with the Minnesota State College Faculty.

PRELIMINARY STUDY TOPICS
Topics addressed in the study will emerge during research and consultation but are expected to include the following:

- Current data and trends of students’ need for remedial education at the state universities,
- Remedial education at the university level within a national context, what other states are doing,
- Alternative models and methods of delivering remedial education, costs and benefits of these methods, and indications of subsequent success of students provided remedial education with these alternate methods

Cite policy requirement, or explain why item is on the Board agenda:

The Chair of the Board of Trustees requested an opportunity to consider a revised timeline for system action plan development and the corresponding institutional work plan process.

Scheduled Presenter(s):

Scott R. Olson, Interim Vice Chancellor for Academic and Student Affairs

Outline of Key Points/Policy Issues:

The following are primary topics for discussion-

- Review of a proposed timeline for development of the system action plan and institutional work plans
- Consideration of potential system action plan focus areas
Development of the 2012-2014 System Action Plan

November 2010
- Leadership Council Academic and Student Affairs Committee reviews proposed timeline and process
- Board of Trustees Academic and Student Affairs Committee reviews proposed timeline and process

December 2010
- Leadership Council discussion of potential system action plan focus areas for target setting or further planning and development

January 2011
- Leadership Council reviews proposed system action plan elements
- Board of Trustees study session on proposed system action plan elements and potential referral of action plan items to appropriate Board committees
- Employee bargaining units and student organizations review and consultation on proposed action plan elements

March 2011
- Leadership Council review of draft system action plan
- Board of Trustees first reading of draft system action plan

April 2011
- Leadership Council review of format and focus areas for institutional work plan
- Board of Trustees second reading and approval of system action plan
- Office of the Chancellor memorandum and institutional work plan format sent to presidents/institutions

May 2011
- Presidents submit institutional work plans by late-May
- Office of the Chancellor reviews institutional work plans

June 2011
- Institutional work plans included in materials submitted as part of Presidential evaluation portfolio

| Oversight of student credit transfer | Easier transfer was a key merger goal and campuses past efforts have resulted in limited progress, but system leaders are making renewed attempts and student associations report continued problems. | Academic and Student Affairs (ASA) has made significant progress in addressing transfer concerns. In January 2010, the Minnesota Student College Association and the Minnesota Student University Association, in association with the system office conducted a survey of students to better identify what the specific transfer concerns were. At the same time, an internal audit was conducted using a sample of student transcripts. The results of the survey and audit led to the development of the Smart Transfer Plan. The Board passed amendments to Policy 3.21, establishing requirement that colleges and universities post course outlines on their websites, making DARS and u.select the official repository of course equivalents and requiring that colleges and universities keep these databases up to date, and requiring the colleges and universities to inform students about the opportunity to appeal decisions about credit transfer. The Smart Transfer Plan includes five major components:  
  - Timeline for posting college and university course outlines by July 2011  
  - Complete evaluation of course equivalencies of all Minnesota Transfer Curriculum courses by July 2011 and remaining courses by July 2013  
  - Ensure that students are informed of credit transfer appeal processes by |

| Faculty professional development  | Campuses could play a stronger role, although the system office has provided good support. | A September 7, 2010 memorandum from the Chancellor has initiated a reassessment of the faculty development role and a restructuring of the Center for Teaching and Learning. Reduced the staff in the Center for Teaching and Learning from 6.5 to 2.5 FTE relying more heavily on institutions providing this function.  
  - The Center for Teaching and Learning’s Steering Committee has been asked to participate in a year-long re-assessment of the Office of the Chancellor’s role in professional development of faculty.  
  - Campuses are being asked to re-assess their role in providing faculty development opportunities formerly offered by the Center for Teaching and Learning.  
    - Initial discussions have occurred at Metropolitan Alliance (a coalition of metropolitan area Minnesota State College and University institutions) chief academic and presidential meetings on alternatives to previous CTL-facilitated options.  
    - Further discussions are scheduled between ASA leadership and Metropolitan Alliance leaders on these alternatives. |

<tr>
<td>Impact and cost-effectiveness of online instruction</td>
<td>Need better assurance of the quality and cost-effectiveness of online instruction.</td>
<td>• Minnesota Online continues to induce colleges/universities to adopt Quality Matters. QM) is a faculty-centered, peer review process that is designed to certify the quality of online and blended courses. QM is a leader in quality assurance for online education and has received national recognition for its peer-based approach and continuous improvement in online education and student learning</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• The Minnesota Online Council approved a competency framework for the development of a resource to prepare faculty to teach online. Faculty representatives were part of the committee that helped create these competencies and the action. Minnesota Online is working with CTL to develop the material and information to &quot;populate&quot; the resource.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Minnesota Online staff are reviewing data from an audit by the Center for Transforming Student Services (CENTSS), a partnership including the Western Cooperative for Educational Telecommunications (WCET) which provides educational institutions with the tools and training they need to develop and deliver high-quality student services online.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Minnesota Online has a service level agreement (SLA) with Research and Planning to develop (a) Student success measures (b) Course completion measures and (c) a dashboard</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Data from Noel-Levitz’ Priorities Survey for Online Learners™ is being analyzed by Minnesota Online staff to identify areas of improvement.</td>

<tr>
<td>Oversight of customized training and continuing education</td>
<td>System office role is unclear; many presidents don’t see clear purpose or leadership in this area.</td>
<td>Office of Chancellor System Director for Customized Training is being eliminated. Business and Industry Advisory Council has been created, and feedback supporting coordination to reduce unneeded duplication and competition has led us to conclude that some system oversight and use of innovation funds is warranted.</td>
</tr>
<tr>
<td>Oversight of specialized training in firefighting and emergency medical services</td>
<td>Unclear why system office needs specialized staff to oversee these programs. Mixed views of system office performance by customers.</td>
<td>The firefighter training and EMT components and the library of the Fire Center will be eliminated or relocated to a campus, resulting in a reduction of 4 FTE. The remaining regulatory, compliance and emergency preparedness functions are located within the Facilities unit.</td>

Recognition of SkillsUSA Award Recipients

Cite policy requirement, or explain why item is on the Board agenda:
Recognition of SkillsUSA student award winners is in response to a Board of Trustee request for formal recognition of the system college award winners from the national SkillsUSA conference held June 19-24, 2010 in Kansas City.

Scheduled Presenter(s):
Interim Vice Chancellor Scott Olson

Outline of Key Points/Policy Issues: n/a

Background Information: A record number of students in technical and career education programs at the Minnesota State Colleges and Universities won gold, silver and bronze medals at the SkillsUSA National Leadership and Skills Conference.

Overall, 31 system students won medals – eight gold, seven silver and 16 bronze – in 19 skill areas, such as crime scene investigation, power equipment technology, automated manufacturing technology, residential wiring, sheet metal, cabinetmaking and entrepreneurship. Minnesota ranked seventh in the nation in the medal count.

In addition to recognition of these students during the Academic and Student Affairs Committee meeting, a reception will be held on Tuesday, November 16, 2010 at 5:00 p.m. in Conference Room 3310 of the Wells Fargo Building.
BACKGROUND: A record number of students in technical and career education programs at the Minnesota State Colleges and Universities won gold, silver and bronze medals at the SkillsUSA National Leadership and Skills Conference held June 19-24 in Kansas City, Mo.

Overall, 31 system students won medals – eight gold, seven silver and 16 bronze – in 19 skill areas, such as crime scene investigation, power equipment technology, automated manufacturing technology, residential wiring, sheet metal, cabinetmaking and entrepreneurship. Minnesota ranked seventh in the nation in the medal count. An additional 22 system students ranked in the top 10 nationally in their competitive events.

More than 5,600 other students took part in the national competition, which is designed to recognize the achievements of career and technical education high school and college students. Each competitor at the national conference had to have earned gold medals at the state level.

Minnesota State Colleges and Universities students, including high school students who took college courses through the Post-Secondary Enrollment Options program, competed at the national level from the following colleges: Alexandria Technical and Community College, Dakota County Technical College, Hennepin Technical College, Lake Superior College, Minneapolis Community and Technical College, Minnesota State Community and Technical College, Minnesota State Community and Technical College, Ridgewater College, Riverland Community College, St. Cloud Technical and Community College, Saint Paul College and South Central College. A full list of the students receiving awards is attached.

At the July 21, 2010 meeting of the Academic and Student Affairs Committee, Interim Vice Chancellor Scott Olson reported on the success of the system’s college students where it was recommended that the Board of Trustees give more formal recognition of these students at a future Board of Trustees’ meeting. In addition to letters of congratulations sent by Chair Scott Thiss, a reception in recognition of the student’s achievements will be held immediately following the Academic and Student Affairs Committee Meeting on Tuesday, November 16, 2010 at 5:00 p.m. in Conference Room 3310 of the Wells Fargo Building.
2010 SkillsUSA Medalists

Alexandria Technical and Community College
Gold
Jordan Haugen, CNC Turning
Joel Hedlof, Mechatronics (high school division)
Patrick Schueller, Mechatronics (high school division)
Tim Evans, Mechatronics
Patrick Triemert, Mechatronics

Silver
Leo Steffl, CNC Milling Technology
Kyle Stach, Marine Service Technology
Eric Nelson, Power Equipment Technology

Dakota County Technical College
Bronze
Michal Albers, Chapter Display
Robert Clark, Chapter Display
Robert Vovk, Chapter Display

Hennepin Technical College
Silver
Rafael Morales, HVACR

Bronze
Paul Manthei, Cabinetmaking
Christopher McCullough, Diesel Equipment Technology

Lake Superior College
Silver
Julie Lagios, Promotional Bulletin Board

Minneapolis Community and Technical College
Bronze
Philip Patton, HVACR (High school division)

Minnesota State Community and Technical College
Bronze
Tyler Foss, Telecommunications Cabling

Ridgewater College
Silver
Ryan Dagen, Welding Art Sculpture

Riverland Community College
Gold
Amber Engebretson, Crime Scene Investigation
John Jorgensen, Crime Scene Investigation
T.J. Lynch, Crime Scene Investigation

St. Cloud Technical and Community College
Bronze
Jacob Wagner, Residential Wiring

Saint Paul College
Bronze
Daniel Hillmer, Sheet Metal

South Central College
Silver
Logan Wilberts, PIN Design

Bronze
Derek Deling, Automated Manufacturing Technology
Jim Walser, Automated Manufacturing Technology
Eric Zins, Automated Manufacturing Technology
David Flicek, Entrepreneurship
Silas Mauk, Entrepreneurship
Jon Smith, Entrepreneurship
Trevor Weaver, Entrepreneurship
