IV. Collaborative Academic Programs, Approved and in Development

The list below presents a sampling of collaborative degree programs presently available through partnerships between the University of Minnesota and MnSCU institutions, as well as additional programs currently in development. The listing is sorted by location of partnership institutions to show the statewide distribution of such collaborations. Program types are defined as follows:

Collaborative Undergraduate Programs

Collaborative undergraduate programs (“Collab”) are known as “2+2” agreements between the University of Minnesota and MnSCU that allow students in residence at one system’s

institutions to apply approved coursework toward completion of degree programs from the other system. Applied Baccalaureate Programs (“Applied”), developed in partnership with MnSCU community colleges, allow students to build focused University of Minnesota baccalaureate programs on approved community college coursework, and to complete the programs on MnSCU campuses.

Graduate/Professional Programs (“Grad/Prof”)

University of Minnesota and MnSCU collaborations allow students to complete UM graduate and professional programs while resident at MnSCU institutions.
